

Laboratories Accredited to Perform Asbestos Evaluations

The Chattanooga-Hamilton County Air Pollution Control Bureau does not certify, endorse, or make any representations regarding the services offered by these laboratories. They are merely provided for your convenience. The Bureau suggests the same scrutiny be used when selecting a laboratory from this list that one would use selecting any other laboratory. Also, this may be only a partial listing of available laboratories as those listed here are used by asbestos inspectors in our area. Air Pollution Control requires that asbestos inspectors submitting inspections to the agency to satisfy NESHAP requirements submit their samples to either NVLAP or AIHA accredited laboratories. The labs listed have had one or both accreditations, but it is the responsibility of the client to confirm the accreditations are maintained.
